

## MONITOR WORKLOAD AND TARGETS IN REAL TIME

The Workload Module monitors the achievement of objectives / quotas / capabilities, by time periods. It works on the same principles as current control columns displayed "horizontally", depending on the time scale

This module extends the capabilities of monitoring the activity by real time visual checks.

Compliant with all Visual Planning 4.4 licences : Stand-alone, LAN/WAN: LAN, WEB, Citrix, TSE.  
Based on Visual Planning proven mechanisms (control columns, visual alarms...).

### Your need

- ✖ Did I plan enough persons each day of the coming week ?
- ✖ Which days of the semester will my projects be under or over-staffed ?
- ✖ What will be the consequences for turnover and resources if a project is delayed ?

### Our offer

- ✔ Calculations on event's duration, values, number,
- ✔ Time periods from the week to the quarter of an hour,
