V isual Planning can adapt to the size of your projects and organization to only offer features that will be useful to you in achieving your goals. It provides a centralized platform where you can plan and supervise all projects in real time, while users update data on the go through easy drag and drop.

**YOUR NEEDS**
Completing internal projects successfully is essential to your company so that it can **achieve long-term objectives** and outpace the competition. But project management is often tedious and can **harm the productivity and creativity of your teams**. Each project may involve many in-house stakeholders, external resources, setbacks, and deadlines, all of which must be monitored precisely at all times.

**SUCCESSFUL PROJECT MANAGEMENT INVOLVES**

- **Planning, coordinating and optimizing teamwork, availability, skills, and locations**
- **Good time management and task prioritization**
- **Tracking and complying with deadlines and budgets**

To allow you to **move faster**, a good project management tool needs to be **flexible and intuitive**, and enable all stakeholders to update the information you need **in real time** regarding task progress, unexpected delays and milestone completions.

**HOW VISUAL PLANNING CAN HELP**
Visual Planning can **adapt to the size of your projects** and organization to only offer features that will be useful to you in achieving your goals. It provides a **centralized platform** where you can plan and supervise all projects in real time, while users update data on the go through easy drag and drop.

“The application proved to be easy to customize for the requirements of various project life cycles in various business sectors. It is a user-friendly tool and was very easy to deploy!”

Vice President – Aerospace Sector
KEY FEATURES

FOR THE PROJECT MANAGER

• Plan and monitor all your projects from a single view
• Review workload and availability of each team member instantly and quickly reallocate them based on their skills and location
• Create project templates and custom validation workflows to help push work in the right direction
• Track overall progress and status in real time on a Gantt chart
  • Create customized reports to evaluate performance
  • Add cost and expenses in tasks or auto-calculate costs based on time spent for an easy budget tracking

FOR THE PROJECT TEAM

• Report on hours and task progress in two clicks
• Get instantly alerted on project changes made by the project manager
• Integrate your project work with your other tools: e-mails, internet calendars, RSS feeds
  • Update project details and documents when traveling through your tablet or smartphone
• Collaborate with other team members in a dedicated project discussion feed

THEY PUT THEIR TRUST IN US

Visual Planning is available in the cloud or on premise. Ask us to see which model fits your organization’s requirements better.
